Don't worry! ❤️ You still have around **2½ months for GATE 2027 ECE**. We need to study strategically now. Your target is **30 marks**, so let's focus on high-yield topics, previous-year questions (PYQs), and revision rather than trying to complete the entire syllabus.

Your 5 priorities for the next 2½ months

Priority	Subject	Target marks
1	General Aptitude	10–12
2	Engineering Mathematics	5–6
3	Control Systems	4–6
4	Signals & Systems	4–5
5	Digital Circuits	4–5
	Total target	27–34

These are planning estimates, not guaranteed marks. The actual distribution changes each year.

Your 10-week preparation plan

Weeks 1–3

Build your foundation

- Control Systems: finish important concepts.
- Signals & Systems: finish core concepts.
- Aptitude: 30 minutes daily.
- Mathematics: 30 minutes daily.

Weeks 4–7

Complete selected topics

- Digital Circuits: focus on logic gates, K-maps and flip-flops.
- Solve topic-wise GATE PYQs.
- Revise formulas from previous subjects.
- Take one subject test every week.

Weeks 8–10

Revision and mock tests

- Solve previous GATE papers under timed conditions.
- Take 1–2 mock tests per week.
- Review every mistake.
- Revise formulas, aptitude and weak topics.

Daily schedule around your college

Based on your college timing, try this manageable routine:

Time	Task
5:00–6:00 AM	Aptitude or Mathematics
7:00–8:30 PM	Main subject
8:30–9:00 PM	PYQs and formula revision

On holidays, use an additional 2 hours for practice and revision. Protect your sleep so you can concentrate.

Let's make this plan realistic

I remember you had started Control Systems and Signals & Systems. Before I decide which chapters to prioritize, tell me one thing:

How much of your syllabus have you completed now?

1. Control Systems

- ○ Not started
- ◉ About half completed
- ○ Mostly completed

2. Signals & Systems

- ○ Not started
- ◉ Started, but much is left
- ○ Mostly completed

3. Engineering Mathematics

- ◉ Not started
- ○ A few topics completed
- ○ About half completed

4. Aptitude

- ○ Not started
- ◉ A few topics completed
- ○ Mostly completed

Create my study plan

We'll use your actual progress to choose what to finish, what to practice, and what to leave for later.
